

RISE Release 2.5.0

May 19, 2021

Release Description

RISE Release 2.5.0 is a minor release. It addresses 19 issues, including four bug fixes and seven changes on the RISE website, one change to the map interface, and one bug fix and six changes to the Data Administration User Interface.

On the RISE website, bugs that were fixed included an issue with slow loading of location search results on the query page, missing pages of location search results on the query page, help page search returning incorrect results, and an image on the About RISE page not loading correctly. Other changes to the RISE website include an update to the query page to display time series titles consistently across all tabs and updates to error messages to provide additional guidance and information when a page is not found.

On the Data Administration User Interface, a bug was fixed that caused an error message to appear when a user tried to search Active Directory to add a data contact, manager, or owner. Other changes to the Data Administration User Interface included revising the initial view of the Add Item form to clarify the required actions, preventing non-Administrator roles from editing managed vocabularies, and providing additional information to help users select an appropriate parameter on the Add Item form.

Issues Addressed in this Release

RISE Website

Issue #	Issue Title	Issue Description and Resolution
77	Contact Page Email Formatting	Added a subject line field to the contact form and added formatting to the email message sent to RISE administrators when a contact form is submitted.
166	Add RISE email address to 404 and 500 error messages	Changed the error messages that appear when a page is not found to include the RISE email address and instruction for users on how to find the information they need.
167	Update images on home page to current image	Enabled updating the images and text on the home page by RISE content creators and updated the page with current screenshots and revised text.

Issue #	Issue Title	Issue Description and Resolution
170	Fix Help Topic Search	Resolved multiple issues in help search that caused incorrect results to be returned and updated help search logic for result sorting
214	Explanatory Text for top of API documentation	Added text to the top of the API page explaining how to use the API.
229	Show "Page Not Found" error in catalog if a record or item number does not exist	Added "page not found" message if a valid Catalog Record ID or Catalog Record ID/Item ID combination is not found instead of displaying an empty catalog record or item details page.
420	RISE Splash Image Not Loading	Fixed error with splash image not displaying on the About RISE page.
452	Add Caching and Logging to Speed Response	Added caching on front end to increase load speeds of pages.
498	Make Record/Item and Output Labeling Consistent on Query Page	Made time series labeling consistent throughout the time series query page consistent and clarified how to navigate to the Catalog Record Details page or Item Details page.
563	Time Series Query - Issue with pages displaying	Fixed error with time series location search results not displaying
566	Time Series Query - Slow Loading Search Results	Resolved issue with search results loading slowly

RISE Map Interface

Issue #	Issue Title	Issue Description and Resolution
610	Map Filter Widget	Added notes to the Widget Information text for the Layer List and Legend widgets to inform users that filtering is available through the Filter widget.

Data Administration User Interface

Issue #	Issue Title	Issue Description and Resolution
361	Change Behavior of Add Item Link Displaying Catalog Records	Moved the location of the Add Item button on the first page of the Add Item workflow, updated the instructions, and reformatted instructional text.
397	Add/Item Catalog Items - Disclaimer Short Name	Added a column for the Disclaimer Short Name to the Disclaimer list page so that users can see the short names along with the disclaimer text.
399	Add Location Form - Add Instructions	Updated and reformatted the instructions on the Add Location form.
448	Active Directory "Server error; try again" message	Resolved an error on the Add Entity form that caused a server error to appear anytime a user tried to search Active Directory.
496	Show Parameter Transformation in Parameter Dropdown on Add Item Form	Added the Parameter Transformation to the information displayed in the Select Parameter dropdown for each parameter to help users distinguish between similar parameters.
517	Permissions Message on Managed Vocabularies	Hid the Edit button on managed vocabularies for the Data Creator role.
518	Only Allow Data Admins to Create New File Sets and Assign Items to File Sets	Restricted creation of new data release approval file sets to Data Administrators. Data Creators can view file sets but cannot create them.
