

# RISE Release 2.7.1

December 17, 2021

## Release Description

RISE Release 2.7.1 is a bug fix release. It addresses one bug with plotting on the Time Series Query page. It was reported through incident #105602 to address a plot not displaying even though data existed in the database.

## Issues Addressed in this Release

[RISE Website](#)

Issue #	Issue Title	Issue Resolution
789	Time series plotting issue	Fixed an issue with time series data point dates that were not being interpreted by the frontend as UTC. Specific plots would then have data points outside the calculated domain, causing an error in the horizontal pixel cache/mapping (for quickly responding to mouse movement), which then caused the plot to not render.
