RISE Release 2.11.2

February 13, 2023

Release Description

RISE Release 2.11.2 is a patch release. It addresses a bug on the Time Series Query page that caused selected Modeled/Observed and Reclamation Region (Legacy) filters to become unselected.

Issues Addressed in this Release

RISE Website (publicly accessible)

Issue #	Issue Title	Issue Resolution
1030	Bug: Selected Filter Checkbox Does Not Remain Selected on the Time Series Query Page Select Locations Step	Fixed a bug introduced in the 2.11.0 release that caused certain filter checkboxes to become unselected when applying the filter. Selected Modeled/Observed and Reclamation Region (Legacy) filter checkboxes now remain selected when the filter is applied.
