

RISE Release 2.15.9

October 21 and October 26, 2026

Release Description

Release 2.15.9 is a minor release addressing three tickets, including two changes to the Data Administration UI and one set of bug fixes on the RISE Website. The Data Administration UI changes include the upgrade of Drupal from 10.4.8 to Drupal 11.4.7 and the migration from ADFS to Entra-ID for user authentication. The bug fixes on the RISE Website resolved three issues with buttons that were inadvertently introduced in a previous release.

Issues Addressed in this Release

RISE Website

Issue #	Issue Title	Issue Resolution
#1580	Bug: Resolve Issues with Button Links from Ember Upgrade	Resolved three issues with buttons that were inadvertently introduced in a previous release: 1) Fixed the API request associated with the Download CSV and Download JSON options on the View/Download menu buttons on the Time Series Query page Generate Outputs step to return only data for the specified date range. 2) Corrected the Download Image menu options to initiate image downloads on left click without being rendered as links. 3) Fixed the Map Data button on Catalog Item Details pages for Geospatial items to open the RISE Map Interface with the Add RISE Geospatial Data widget open.

Data Administration UI (Not Publicly Available)

Issue #	Issue Title	Issue Resolution
#1338	Update Drupal to Latest 11.x series	The Data Admin UI was upgraded from Drupal 10.4.8 to Drupal 11.4.7 ahead of Drupal 10's end-of-life date of December 16, 2026.
#1566	Migrate RISE from ADFS to Entra-ID	In alignment with DOI OCIO's requirement to migrate user authentication from ADFS to Entra ID by October 30, 2026, the RISE Data and Content Administration UI was updated to use Entra ID for authentication.
